SKILLS

Front-end: HTML5, CSS3, SASS, Bootstrap, CSS-Grid, Flexbox, Javascript ES6 Gulp, Webpack, React, Git, Bash

Back-end: Node.js, Express.js, REST APIs, NPM, MongoDB, SQL, Google OAuth, Heroku, PHP, WordPress

Graphic: Sketch, Adobe Illustrator, Adobe Photoshop

EDUCATION & TRAINING

A.A in Mobile and Web Design | Berkeley City College, CA, 2018

A.S in Library Information Technology | City College of San Francisco, CA, 2015

B.A in Law | Ramkhamhaeng University, Bangkok Thailand, 2006

Languages: English , Thai

WEB DEVELOPER PROFILE

Graduate in Mobile and Web Design with comprehensive training in developing highly functional web-based solutions. Experienced in collaborating with engineering teams to quickly ship new front-end experiments. Capable of writing modular, secure, and well-tested front-end code using Javascript ES6, HTML5, and CSS3. Demonstrate strong front-end development skills in building sites using content management systems or static site generators, along with effective communication abilities in articulating complex information in a way that both technical and non-technical audiences can easily understand.

Areas of Expertise

Software Engineering

Front-end Web Programming

Technical Support

Web Development

Back-end Web Programming

Quality Assurance

User Interface Design

Database Management

Data Entry & Analysis

RELEVANT PROJECTS

- Developed websites using front-end web technologies such as, SCSS and BEM Methodology for clean and reusable CSS code. Using Gulp.js and others NPM library such as webpack, css-nano, and imagemin to automate development tasks and to maximize the loading time up to 99-100%.
- Created websites using Bootstrap 3 and 4 framework to minimize the development time.
- Build web application using Node.js feature, which allows the sending of HTTP requests to MongoDB database with improved level of security and encryption.
- Portfolio www.noisinnang.space.

EXPERIENCE HIGHLIGHTS

Teacher Assistant, 2017 to Present
Berkeley City College, Berkeley, CA

- Provide assistance to students in improving their proficiency in the use of WordPress covering the installation of theme and plugins, development of child themes, online uploading of projects, and creation of posts, features, and widgets.
- Assisted students with the necessary HTML5, CSS3, and 960 grid, and enhanced their knowledge of UI and UX design.
- Developed an instruction manual on how to use Sketch using Git, Gitbook, Markdown language, and Google Slide.
- Incorporated crucial updates to the school's Multimedia Arts WordPress site and Wellness Center WordPress site.

Library Aide, 2012 to Present
Public Library, Berkeley, CA

- Perform a wide range of duties for managing library resources including sorting, shelving, and retrieval books and other library materials using alphabetical, numerical, chronological, and Dewey Decimal classification systems.
- Provide assistance to library card applications, and processing of library card usage policies and procedures.
- Conduct technical support services to library equipment including troubleshooting of issues for computer hardware, software, and peripheral devices.
